

# Just Suppose Madam

that you could find exactly the kind of GOOD Coat that you have in mind, and that the price (as you had quite expected) would be between \$275 to \$397.5. And then suppose further that after you had put on this nice Coat, you found that you had not paid for it yet. You WERE HANDLED THAT WAY, THOUGH, MADAM BILL! Would that not be a pleasant surprise "or wouldn't it?" Well, that's just what happened to me last week and it's still the order of the day for this coming week! What about the Coat? It was a very trimmed Japanese Mink, Persian Lamb, Squirrel, Red and Silver Fox, and last but not least, a White Fox, mostly black. These are the quality and style of Coat that YOU want—so why not?

## PARTY GOVERNMENT, OR COALITION?

The reorganization of the British Columbia Liberal Cabinet on a renewed party basis caused some in the Administration to wonder if they had the political situation under control. The stark fact remains that in the last election the Liberals, under Mr. J. L. Thompson, were defeated by the Conservatives. As a party administration it can be defeated on any vote on which the Government sits. This was the case in the recent vote of confidence motion introduced by the Opposition.

The assumption has been, since the indecisive result of the previous election, that Mr. T. D. Pattullo would feel the weight of political responsibility too heavy for him to remain in government representing all parties. He was made aware that the members of the C.P.C. would not support his continued tenure in office.

Then there was still another substantial portion of political opinion which was in favour of continuing the present government and to provide a majority of another election being held within a few months. Mr. Pattullo would have been compelled to resign from the Government of two parties. The Conservatives had already indicated their willingness to participate in a coalition government. It was felt that he would bring about stability in the provincial political situation.

The Premier's decision is to remain in the Legislature next month with his reconstructed party Government and to attempt to carry on as he has done up to now. He has no desire to go into politics. In the circumstances it will be the duty of the Opposition to do its best to expose the failings of this new government which will interpret the wishes of more than 60 per cent of the aggregate of votes cast in the election. It is felt that the reason why he is in this position is within his constitutional rights but that his political wisdom may well prove to be a serious handicap to him. It is felt that he should remain with his party in the Legislature. In the circumstances it will be the duty of the Opposition to do its best to expose the failings of this new government which will interpret the wishes of more than 60 per cent of the aggregate of votes cast in the election. It is felt that the reason why he is in this position is within his constitutional rights but that his political wisdom may well prove to be a serious handicap to him. It is felt that he should remain with his party in the Legislature.

Dr. G. M. Weir, Minister of Education and Provincial Secretary, has resigned his portfolio and who has resigned his portfolio, though still carrying on until a successor is appointed, favours continuing the present government. He has a seat in the Senate if he believed that he if removed he would be considered as Minister of Education by Mr. Thompson. He has however, said that he would not enter a minority government.

These decisions, held by three of the Premier's colleagues, indicate that the future of the party is one of disatisfaction with the decision of Mr. Pattullo to remain to carry on with a Liberal Government.

The situation can only be interpreted as meaning that members of the Liberal party "should have been given greater opportunity to express their views upon what very likely will be the policy before a new Cabinet was formed." That proves that the party is in a state of flux at which Mr. Pattullo explained what he intended.

With the state of parties as it is in the present situation, it is felt that the best course of operation in administration as will make it unnecessary for another election to be held in the near future is to have a coalition government.

On the situation to the Legislature it will not be known if he has closed the door to the possibility of a coalition government. It is felt that, based upon testing the ability of his party to govern, he will be very slow in accepting a coalition because of this attitude. However, it is felt that he is precluded within the next few months for the electorate to have the opportunity to assign the blame where it belongs.

**J. WILL STOP AT NOTHING.**

The Minister of National Defence believes presumably because the Government has failed in the task that it is civilian energies that should arouse the people of Canada to their responsibility in the war effort. He has called upon the Canadian Army. He says moreover, that no limitative has been placed upon the number of divisions that Canada will raise. He had a meeting with the Canadian Chiefs of Staff in October. Moreover, there is a large and growing volume of military personnel and equipment sufficient among all in war effort.

The Minister of National Defence is quoted in Hansard as follows: "I am not defeatist. I am not simply because we say so, but because Canada along with the other democracies, will stop at nothing which can be effectively done to ensure that the forces of evil shall be stamped out. One measure of slavery should be abolished, and that force should be used to stamp out the forces of evil, which, until this struggle began, we in this Dominion have been too lenient and too generous for granted. We cannot take it for granted any longer. The spirit against Canada as well as against the rest of the world is not to stop at nothing."

Thus, the Minister of National Defence who is responsible for raising the Army which Canada has been asked to contribute to the war effort, has declared that the country is not providing enough men for political exigencies. Canada has stopped short of the single exception of the Royal Canadian Mounted Police.

This is the official admission that what must be done is to stop at nothing. The Royal Canadian Mounted Police is the only organization which has not been asked to contribute to the war effort. The Royal Canadian Mounted Police is the only organization which has not been asked to contribute to the war effort.

Thus, the official admission that what must be done is to stop at nothing. The Royal Canadian Mounted Police is the only organization which has not been asked to contribute to the war effort. The Royal Canadian Mounted Police is the only organization which has not been asked to contribute to the war effort.

There is also the official admission that what must be done is to stop at nothing. The Royal Canadian Mounted Police is the only organization which has not been asked to contribute to the war effort.

There is also the official admission that what must be done is to stop at nothing. The Royal Canadian Mounted Police is the only organization which has not been asked to contribute to the war effort.

## ON THE RECORD

By DOROTHY THOMPSON

## THE WEEK

BY SIR GARTH GRAVEN

## THE WEEK

# Plays and Players

Ginger Rogers Appears  
In "Star of Midnight"

Fascious Ginger Rogers finds a new way to a man's heart in "Star of Midnight."

Adams board on the Mary Astor name by the late Arthur Darrow, who directed it at the York Theatre tomorrow. The man in the cast is debonair William Powell, who has made the self object of his affections by helping the true love to a baffling mystery.

With a few exceptions, the cast apparently have more time on their hands, a number of clever deductions are worth a pound of dramatic interest.

## WARNER BAXTER STARS AT ATLAS

"Adam Had Four Sons" is Taken From Charles Goren Novel, "Leggy"

The romantic story of five fast-talking men and the women in their lives, written by the author of "Mister and Mrs." and "The Man Who Would Be King," is the basis of the new play "Adam Had Four Sons," which opens at the Alouette Theatre this evening.

Based on the hit Broadway comedy "Leggy" (and of "Mister and Mrs.") from Charles Goren's novel, "Adam Had Four Sons," stars Warner Baxter and Robert Cummings, and is set in "Paris, France."

Plot—Deanna Durbin and George Murphy are the two stars in "Star of Midnight." "Star of Midnight" stars ginger Rogers, William Powell and George Murphy.

Very good supporting cast, which includes Melvyn Douglas, Alan Hale, Jr., Robert Greig, Robert Young, Richard Denning, Johnny Downs and Robert Shaw.

## "A GIRL, A GUY, A GOB" AT RIO

Lucille Ball, George Murphy and Edmund Gwenn star in "Rabbit, Run."

Dealing with the romances of a pretty secretary, a young heating engineer, a racing driver and a woman who has just come off the train, "Rabbit, Run" is a "Gob" of a girl, a Guy and a Gob." It stars Lucille Ball and Edmund O'Brien to the screen of the Rio Theatre in a six-week run.

Briefly, the story has to do with the boyishness of a middle-aged secretary (Lucille Ball) who is engaged to be married in a happy-go-lucky manner to a heating engineer (George Murphy), but who inadvertently falls in love with her

boyfriend (Edmund O'Brien) while trying to humanize

# Robe Them the Right Way This Christmas House Coats--Robes--Dressing Gowns

A View of Our Comprehensive Assortment of Dressing Gowns for Men, Women and Children Will Convince You That the Styles and Qualities Are Equal to the Best Your Imagination Has Pictured. Select Your Favorite Now While the Selections Are at Their Best!

## Beauty Begins at Home

### Lovely, Gay, Warm House Coats and Robes

Make Your Leisure Hours Your Loveliest in a Cosy Wrap of Shimmering Quilted Satin, Fluffy Baby Chenille, English Flannel or Beacon Cloth

### Luxurious Quilted-Satin House Coats

Long regal lines with fitted waists and sweeping skirts. Full-length zipper makes them easy to get in. Lined with either self or contrasting shades. Also in wrap-around style, tied with grosgrain ribbon. Colors: Red, Yellow, Orange, Rose, Mauve, Fanny, Turquoise, Rose, Wine and Blue. **\$10.95**  
Sizes small, medium and large.

### Supremely Lovely Chenille Robes

We are proud to offer you "Fabs Chenille Robes," meaning the chenille that is smaller, finer and so close that you see none of the background. These soft velvet-like robes have a fullness and richness of color and good quality. Colors: Red and deep powder blue, pink, rose and blue. **\$4.95**  
Sizes small, medium and large.

**\$4.95**

### Fineness Quality Chenille Robes

Smooth princess fitting lines with upper front Blue, pink, white and rose. Also a two-tone combination in a beautiful wrap-around gown. **\$8.95**

**\$8.95**

### Barrymore Flannel Robes

Classically tailored and finished in English style. Made of soft, warm, plaid flannel. Magnificently tailored styles generously cut with full hems. Many more luxurious fashions will follow in stockings, fur-trimmed and upper fronts. Sizes 14 to 42. **\$9.95**

**\$9.95**

### Attractive Winter Gowns of Beacon Cloth

Warm cotton embroidery in floral designs as well as plain slabs. Practical because they wash well. Colors: Rose, wine, \$2.98  
Sizes 36 to 44.

**\$2.98**  
ROSES in plain slabs of blue, rose, green.  
Sizes 36 to 52.

## Stanford Beaten By State Squad; Notre Dame Wins

Last Season's Rose Bowl Winners Are Topped by Washington Cridders in Biggest Upset of Day\*

Programme of American Football, 11-13  
Fighting Irish Nose Out Northwestern, 7-6

By TOM KIMM AND BOB COOPER  
Sports Staff Writers  
NEW YORK, Nov. 15.—The Hornet Frogs of Texas Christian romped a 40-10 win on Duke's Duke's Tech's Leavenworth Field, left Minnesota, Duke Texas A & M, and the University of the South's country school remaining make up the 11-13.

Hold to a shocking tie by Baylor a week ago, Texas came more than to from the Southwest, won 10-7, and bowed to Texas Christian, 14-7, in a game that was suspended from Ennis to Van Hall.

This sensational upset left the door open for Notre Dame to gain to the Southwest Con-

house, proved no match for Michigan, 26-13, by Tom Kimm and Bob Cooper. The Penn State team, which Georgetown captured North Carolina State, the State of Michigan, and the University of the South, was beaten by Stanford.

Their 10-7 victory, three touch downs at Princeton topped Yale, 20-6, in a Big Three regular season game.

Stanford, which had been inactive in beating an all-Inv League team, was beaten by Cornell, 14-13,

in the Far West. Washington, which had been inactive in being upset by not out, ended its season with a 10-7

loss to Penn State, which had been inactive in being upset by Cornell.

Pepperdine's Rose Bowl plants into

defensive title once more. The Apricots nearly mortified Rice 14-6, for their

second consecutive loss.

They have only one Conference game on the slate—a November 27 meeting with Cal Poly.

In the Far West, Washington

had been inactive in being upset by not out,

and Cornell, 14-13, was beaten by

Washington, 10-7, in a Big Three regular season game.

Their 10-7 victory over the Nation's No. 1 team, which had been inactive in being upset by Cornell, 14-13,

last Saturday, was the first time they

were inactive in being upset by Cornell.

Washington, 10-7, was beaten by

Stanford, 14-13, in the Far West.

## PAY INCREASES RESTORED CUTS

**Higher Living Costs Not Met.**  
By Raises, Saanich Employs Say

Pay increases given Saanich municipality last week were not enough to restore of depression era cuts and do not take into consideration the cost of living since the outbreak of war. A formal protest was made by the council for the employees to demand three more out-of-pocket arbitration board awards to bring up wages to the Courthouse.

In his opening statement of the case for the employees, Mr. Bleasdale claimed the two workers' motions received on November 10, 1940, were admitted to receive under previous arbitration awards, but that the Saanich Council was well aware of an urgent wage increase was being demanded by the employees.

Mr. Bleasdale said in his speech at high as that paid in the city on the same scale. He said he had come to meet the jump in living costs. Wages, he said, did not compare with those in Victoria or other municipalities.

### MEN PAGE ONE

Mr. Bleasdale averred the absence of any regular wage schedule in Saanich, and that the council had no regular pay increases on the basis of efficiency and service of the workers, as was the case in the department.

Another speaker, Mr. Roy Moyer, had been "baffled" in the past, he claimed.

During the morning session, Mr. Roy Greene, Saanich municipal clerk, said there had been no change in employee salaries since 1939, and that all wage cuts had been restored.

The Saanich tax rate ranks eighth in the province, and the town has one of the highest in the province, Mr. Greene said.

Roy Moyer counsel for the municipality, summed up the evening hearing by saying the council had met each week at the conclusion of the proceedings.

Phinias of the board, consisting of O. Howard Hartman, chairman, H. E. McLean, vice-chairman, and Mr. Bleasdale, will be submitted by November 24.

### NORF PRESIDENT DIES

COLO. Nov. 13.—Prof. Fredrik Stenius, president of the Norf Institute since 1931, died yesterday.

Prof. Stenius, 64, was a former president of Oslo University.

## AND THE WALLS CAME TUMBLING

By JOSEPH McCORD

(Memphis Jolt by Joseph McCord)

CHAPTER XII  
Jerkoff's good fortune was tempered by the fact that his grilled waffles were so good that he could not resist the open front door and he had to stand outside to witness Caruso's goings-on.

Wife had to be sent away, but she was coming along in causal in the end. She was a good sport, though, and Wags was left with the house impressed that it was preserved.

It may have been time for Caro to leave, but the house had the afternoon off. The maid had been given respite to go to the movies, and the house was quiet except for the sound of a typewriter.

It was a funny time for Caro to leave, but the house had the afternoon off. The maid had been given respite to go to the movies, and the house was quiet except for the sound of a typewriter.

## POPEYE

ARE YOU STAYING  
ASHORE LONG, POPEYE?

I DON'T KNOW,  
ROUGH-HOUSE.

I HAVE A  
VOCAGE PLANNED.  
I'M GOIN' ON  
ALONG, BUT—

BUT WHAT?

LISSING DO  
YOU BELIEVE IN  
INSTINCT?

YES, OF COURSE.

LOTS OF TIMES I  
AM BACK IN THE  
CITY, SOMETHING TELLS  
ME A CUSTOMER IS  
THAT'S OUT  
PANTING.

SLIMPIN' KEEPS  
TELLIN' ME  
THAT'S THE  
THING IN ME  
THAT'S  
ABOUT TO  
HAPPEN.

AND YOU  
DON'T  
KNOW  
WHAT IT IS?

NOTHING,

ANYTHING.

## FINANCE - COMMERCE - MARKETS

## Little Recovery Power Shown On Wall Street

## FOREIGN EXCHANGE

**Montreal, Nov. 16 (AP)—** Another disappointing week with much uncertainty as to what may happen in the future.

At the start of the brief session, the market was up, but then fell sharply to end yesterday's break rally.

Scattered favorites managed to hold their ground, but most slipped behind minor signs and were off at the close.

The Associated Press average of forty stocks was unchanged at 39.7, while the one off the day was off 3.7.

It was the third successive day of gains for the market, which was the best for any five-day stretch since early August and the second best for the year.

American Utilities preferred got up 10 cents to 100, while the rest of the group movement was retained by General Motors, Southern Pacific, Canadian Pacific, Canadian National, Western Union, United States Rubber, Standard Oil, and Westinghouse and Union Carbide.

United Pacific and the two junior railroads, Illinois Central and Chicago & North Western, were up 10 cents each, while the rest of the market was down 10 cents.

On the off day, the market was down 10 cents, while the market was up 10 cents.

Twelve utilities, 100 shares, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 50 shares, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 25 shares, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 10 shares, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 5 shares, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 2 shares, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/2 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/4 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/8 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/16 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/32 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/64 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/128 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/256 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/512 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/1024 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/2048 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/4096 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/8192 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/16384 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/32768 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/65536 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/131072 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/262144 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/524288 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/1048576 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/2097152 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/4194304 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/8388608 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/16777216 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/33554432 share, were up 10 cents each, while the rest of the market was down 10 cents.

Twenty utilities, 1/67108864 share, were up 10 cents each, while the rest of the market was down 10 cents.

# Half Million Australians Fighting

Recently half a million men under arms for service at home or overseas, the great majority of whom

are in the armed forces, are fighting on land, sea, and in the air.

As the result of Australia's war effort, production of such basic materials, airplanes, and ships, has increased many times over. In addition, Australia has become one of the world's chief producers in such production, measured either by quantity or quality. The number of Australian citizens of all "military workers" — men, women, and children — in the prosecution of war behind the scenes,

is now estimated to be twice as great as was

the case two years ago.

**A**FTER two years of war, Australia can claim a glorious record.

Her population is only a little

more than 7,000,000. The population of the Commonwealth is now more than twice as great.

In the financial year ended June 30, 1941, Australia spent \$652,200,000 on the prosecution of war, and will spend \$705,250,000 on it during the current financial year.

The Royal Australian Imperial Force

in the first World War became Australia's greatest national tradition. The A.I.F. in this war has become Australia's greatest and established another in its own right.

About 170,000 men have joined the present A.I.F. About 100,000 of these men are abroad, while some are serving in Australia and territories under command of the Commonwealth. The "A.I.F. Overseas" includes men in the United Kingdom, Libya, Egypt, Palestine, Syria and Malaya.

The A.I.F. first went into action towards the end of 1940, when General Sir Archibald Pattle, the Australian commander, advanced upon Libya. The Australians were in the vanguard of that advance. It was a small force, but the gallantry of each soldier added to his reputation for courage, initiative and daring.

The Australians fought in Greece and Crete, where it fought gallant rear-

guard actions, and then in Syria, where it

managed to capture the British Army and the Free French.

One Victoria Cross and more than 300 other decorations for bravery and com-

mitment to duty have been awarded to men of the A.I.F.

In May, the A.I.F. stationed on guard to

defend Britain, signed an agree-

ment.

**E**arly in 1941, the R.A.F. went British

and British troops are taking part

in one of the epic's of the war—the

gallant defense of Tobruk.

Even though they have had

Turkey against violent enemy assa-

ult, and in the words of one Australian was

concerned, "We're not bad."

The men of Tobruk are sharing

some of the most difficult conditions

of that isolated fortress, but for their brilliant

and successful policy of offensive de-

fense and the use of their superb

tactical skill, they have survived

in extremely difficult conditions. The enemy outside Tobruk has been reduced to a

a state of impotence.

When the Germans look cynically in

less than a fortnight, Tobruk will be

the last bastion of British occupation.

The Australian dug in there, with

the object of holding the harbor which would give the Allies the best

natural harbor on the whole of the North

African coast.

**S**HIPS AND GUERRILLAS

Men of the R.A.N. and the Royal Australian Air Force have been able to take supplies and equipment to the garrison. British ships come and go in the Indian Ocean, and of those of which there have been more than a thousand British possession of the harbor also the port of Aden. Lines of communication are stretched over hundred of miles. His supplies have to be taken overland from Tripoli, Bengal, or Derna.

Most of the garrison's offensive work is done by the Royal Australian Engineers, who are working in their underground trenches and stalk forth on their deadly and successful patrols. They have to be constantly on the alert, for the enemy does not rest, and all reports reaching Australia emphasize the infinite treacherousness of the desert.

It is a strange life, a hard life, but the British troops are cheerful and determined. They live in the hills, in the deserts, in the swamps, in the mud, but there is no short cut to victory. Their supplies have to be taken overland from Tripoli, Bengal, or Derna.

# Mountains Tell More Tales

By Robert Connell

**T**HIS unknown writer of the ancient drama of Job represents his hero as the author of the world's creation. He has created beings of the Alphas, betwixt the lower end of Brule Lake and Jasper are the outer range of the Rockies, where the older Devonian-Carboniferous limestone has paid out your Cretaceous sandstones and shales. They correspond in character and thickness with those in the east. But on the west, where they are seen from Jasper, these limestone mountains show a marked thinning out towards the southwest.

Along their western front runs the Maligne River, which rises in beautiful lakes.

The east lies another mass of mountains extending away to the southeast; these are the Selkirks, composed of Cambrian quartzite, from which has come most of the loose stones of Jasper, as well as the bedrock. They are noted for their great durability to public buildings and structures. The colors are reddish, purplish, and greyish. The Selkirks and west ranges lie the broad, irregular valley of the Athabasca as it comes northeastward from Jasper, and the Yellowhead Pass. Confounding by rail, the Yellowhead Pass is crossed about fifteen miles west of Jasper, and the valley of the Athabasca is crossed by the great Fraser, along whose side the railway follows the river from the east margin with the Nechako from the west margin at Prince George. This is indeed a land of contrasts, as the railway passes northwardly past the apex of the Big Bend, is only a little more than forty-five miles long, and crosses the Selkirks at its narrowest point.

Now we have what I call the "Maligne Valley," which follows the valley of the

Nechako, and the Yellowhead follows the

valley of the Fraser, and the Maligne Modern Valley is plain!

But it is plain that the writer of Job did not expect to find such a scene as this across his path, and he must have been greatly disappointed.

"Ask now the beasts and they shall teach

The Fours of the air and they shall speak their true minds.

Or speak to the earth and it shall teach

the secrets of the sea shall decide

And the fables of the sea shall decide unto thee."

And the answer is:

"Who knows not in all these That the hand of the Lord hath wrought that?"

In whom then is the soul of every living thing

And the breath of all mankind."

But it is plain that the writer of Job did not expect to find such a scene as this across his path, and he must have been greatly disappointed.

"Surely there is a mine for silver,

And a place for gold which they refine;

Iron is born, and lead out of the stone;

Man setteth it out and dursteth

And searcheth out to find for himself

The veins of silver and brass, and of the

shadow of death;

Men remove a shaft away from where

men squalor.

They are forges of the foot that passeth by;

They hang afar from men, they swoop down,

As the birds fly, out of it cometh bread,

And underneath it is turned up as it were

by the hand of man.

The stones thereof are the pieces of

sapphires, and it hath dust of gods;

The top of it is hid of prey knoweth,

Neither hath the falcon's eye seen it;

The proud bear has not trodden over it,

Neither the lion's whelp, nor the bear cub,

He putteth forth his hand upon the flinty rock."

He overcometh the mountains by the rock;

He cutteth out channels among the rocks;

And he driveth every man from them;

He bliteth the streams that they trickle not;

And the stones that are left are made for him to light."

So we are not wrong in saying that the prospector and miner have got us to "speak to the earth," and made us aware of the geological processes that took place in the days before the science of geology.

The "Earth" is the name given to the mass of rocks "hanging after men," or penetrating the earth's crust by profound shafts, "which are not visible to the eye, but see the earth differently from the people or the whole of the townsmen." But even though his fingers have not been伸入ed to those significant movements, modified and carious forms, or rest that we see in the rocks, cliffs, crags, chasms, and other cross-sections. Broken as these may be, the prospector can see the earth differently from the people or the whole of the townsmen. But even though his fingers have not been伸入ed to those significant movements, modified and carious forms, or rest that we see in the rocks, cliffs, crags, chasms, and other cross-sections. Broken as these may be, the prospector can see the earth differently from the people or the whole of the townsmen. And the stones that are left are made for him to light."

"Well, if any dealer tried to make me take this book, I would not let it enter my house!"

"You can get the same book at another shop— even if you had to wait for it."

"But she doesn't know," persisted Mrs. Craig, "that I am not the one that one try to make to take all three."

"Are they not a set? Don't belong together?"

"No— no, three separate samples! Printed separately in plain figures! But who knows I collect them— that's why

"If any dealer tried to make me take this book, I would not let it enter my house!"

"You can get the same book at another shop— even if you had to wait for it."

"Even so, I wouldn't fall for any such methods! An embezzler swallows his sample! This afternoon a dealer came in, a sharpie, a dark-skinned man, and his first sample has ever been伸入ed to those significant movements, modified and carious forms, or rest that we see in the rocks, cliffs, crags, chasms, and other cross-sections. Broken as these may be, the prospector can see the earth differently from the people or the whole of the townsmen. And the stones that are left are made for him to light."

"Dear, couldn't we wait a week?" I said.

"Not— Not do you any good if you do?"

"Well, grabbing rascals! Following her through the quiet side street to the avenue beyond. Here many antique shop windows are filled with the latest fashions, and the proudest of them all, the course, the dull does more for what the shaft used to do, and at the same time fascinates the eye with the suggestion of the story gone. The Father of British geology, William Smith, learned the science of stratigraphy from the rocks he met with in his engineer's work.

By the Lowest Pass

A long Kicking Horse Pass of the Canadian Pacific Railway is the highest traversed by the Rocky Mountains, so the Victoria Colonist reported in 1908. The Canadian National Railway is the lowest. Over the first the train rises to 5,239 feet, and descends to 4,000 feet, while the third is the Crown's Net Pass, with an altitude of 4,047 feet. These are the elevations of the three passes, and the outcome he met with in his engineer's work.

The entrance to the Rockies by the C.R.B. is approached over a country marked by the Columbia River, between Calgary and Kamloops. The man who "with an eye for the country" will see no more than the Columbia, and the presence of black spruce and tamarack and the number of swampy lakes and marshes, and the absence of timber. That along the Bow between Cochrane and Morley, the farmers over much of the area were compelled to clear the land of the drought areas as we do the dunes of sand, and the dry ground, and the desert, deeply furrowed by large streams between the mighty Athabasca and the Saskatchewan, and the two rivers run along one side of the Athabasca Valley, a reader of Alexander Mackenzie's travel narrative will be surprised by his bewilderment at the beauty of the country to the Pacific and how he saw birds of wild creation feeding on the banks of the Columbia, and how he saw them from the water. The railway, already taking a southwest course, enters the rock-walled valley that cuts the eastern Rockies, and passing Brule and

Jasper Lakes, broodings of the Athabasca, comes at length to the little town of Jasper, where the railway crosses betwixt the lower end of Brule Lake and Jasper are the outer range of the Rockies, where the older Devonian-Carboniferous limestone has paid out your Cretaceous sandstones and shales. They correspond in character and thickness with those in the east. But on the west, where they are seen from Jasper, these limestone mountains show a marked thinning out towards the southwest.

Along their western front runs the Maligne River, which rises in beautiful lakes.

The east lies another mass of mountains extending away to the southeast; these are the Selkirks, composed of Cambrian quartzite, from which has come most of the loose stones of Jasper, as well as the bedrock. They are noted for their great durability to public buildings and structures. The colors are reddish, purplish, and greyish. The Selkirks and west ranges lie the broad, irregular valley of the Athabasca as it comes northeastward from Jasper, and the Yellowhead Pass. Confounding by rail, the Yellowhead Pass is crossed about fifteen miles west of Jasper, and the valley of the Athabasca is crossed by the great Fraser, along whose side the railway follows the river from the east margin with the Nechako from the west margin at Prince George. This is indeed a land of contrasts, as the railway passes northwardly past the apex of the Big Bend, is only a little more than forty-five miles long, and crosses the Selkirks at its narrowest point.

Now we have what I call the "Maligne Valley," which follows the valley of the

Nechako, and the Yellowhead follows the

valley of the Fraser, and the Maligne Modern Valley is plain!

But it is plain that the writer of Job did not expect to find such a scene as this across his path, and he must have been greatly disappointed.

"Ask now the beasts and they shall

teach the Fours of the air and they shall

speak their true minds.

Or speak to the earth and it shall teach

the secrets of the sea shall decide

And the fables of the sea shall decide unto thee."

And the answer is:

"Who knows not in all these That the hand of the Lord hath wrought that?"

In whom then is the soul of every living thing

And the breath of all mankind."

But it is plain that the writer of Job did not expect to find such a scene as this across his path, and he must have been greatly disappointed.

"Surely there is a mine for silver,

And a place for gold which they refine;

Iron is born, and lead out of the stone;

Man setteth it out and dursteth

And searcheth out to find for himself

The veins of silver and brass, and of the

shadow of death;

Men remove a shaft away from where

men squalor.

They are forges of the foot that passeth by;

They hang afar from men, they swoop down,

As the birds fly, out of it cometh bread,

And underneath it is turned up as it were

by the hand of man.

The stones thereof are the pieces of

sapphires, and it hath dust of gods;

The top of it is hid of prey knoweth,

Neither hath the falcon's eye seen it;

The proud bear has not trodden over it,

Neither the lion's whelp, nor the bear cub,

He putteth forth his hand upon the flinty rock."

He overcometh the mountains by the rock;

He cutteth out channels among the rocks;

And he driveth every man from them;

He bliteth the streams that they trickle not;

And the stones that are left are made for him to light."
